Nellore Andhra Pradesh

Career Objective

Aspiring embedded engineer skilled in C, C++, data structures, Embedded C, ARM LPC2129 processors, real-time operating system ,communication protocols UART, SPI, I2C, CAN, Linux system programming. Experienced in developing industry-oriented projects, eager to innovate hardware and software solutions that simplify life.

Education

- **Bachelor of Technology in Electrical and Electronics Engineering** 2024
- VEMU Institute Of Technologies chittoor, Andhra Pradesh
- CGPA: 7.5

- **Diploma Electrical and Electronics Engineering** 2019
- Dr Y C James YEN Govt Polytechnic, Kuppam Andhra Pradesh
- CGPA: 6.3

- **Board of Secondary Education** 2015
- N.B.K.R Model High School, Vidyanager
- CGPA: 7.0

Training Projects

- **Reverse Car parking System Using CAN Protocol**: Design and develop a intelligent revers parking system using CAN protocol to assist drivers in parking safely and efficiently.
  Technologies Used: Ultrasonic sensors, keil software ,UART protocol, two LPC2129 ARM Controllers, LED

- **Employee Attendance system using RFID**: The goal of the project is to scan the employee card number using RFID reader ,to calculate employee arrival time and date from RTC using I2c protocol and display its on 16*2 lcd and store into database.
  Technologies Used: I2c protocol, UART protocol, RTC, RFID-reader

- **Data Acquisition System**: Designed a system to collect, monitor, and analyze data from various sensors, including temperature, humidity, and pressure sensors. The system also visualizes the data using graphical user interfaces.
  Technologies Used: Arduino, Sensors (Temperature, Humidity, Pressure), MATLAB/Simulink, Data Visualization.

- **Student Database Management System**: Created a database system to manage student information using linked list structures, with features to add, edit, delete, and search records.
  Technologies Used: C Programming, Data Structures, Linked Lists, File Handling.

- **Customizable Pre-Processor**: Developed a pre-processor for C code to automate common tasks like code optimization, error detection, and compilation.
  Technologies Used: C Programming, Compiler Design, Code Optimization.

- **Home Automation via Bluetooth**: Built a system to remotely control home appliances using Bluetooth technology, allowing users to control devices from their smartphones.
  Technologies Used: LPC2129 Microcontroller, Bluetooth, Embedded Systems, C Programming, Keil IDE.

- **Implementation of String Using Operator Overloading in C++**: Implemented string operations using operator overloading in C++.
  Technologies Used: C++ Programming, Operator Overloading.

- **Implementation of Stack Using Templates in C++**: Developed a stack using templates in C++.
  Technologies Used: C++ Programming, Templates, Data Structures

---

Academic Projects

- A novel multi-output voltage Dc-Dc converter for electric vehicle integration

---

Professional Training

- **Vector India Pvt Ltd, Bengaluru**: Hands-on training in embedded systems and practical applications of CAN protocols.
  Duration: May 2024 – Present

Technical Skills

- **Programming**: C, C++, Python, Data Structures, Embedded C, Shell scripting
- **Hardware**: ARM7 (LPC2129)
- **Operating Systems**: Linux system programming, RTOS
- **Protocols**: UART, SPI, I2C, CAN
- **Tools/IDE**: Keil IDE, Ubuntu, Proteus 8, GCC, Flashmagic

---

Certifications

- **Certificate of Internship Completion on Embedded Systems**: BIST TECHNOLOGIES PVT.LTD (2 months)
- **Certificate of Course Completion** : Codethantra certified python programming

---

Soft Skills

- Strong communication and presentation skills
- Quick learner and effective time management
- Team leadership and collaboration

Achievements

- Got 1st prize in drawing competition on environment day in diploma.
